

Flat Modular Line Cord

Y9500-10C Series

FEATURES

Flat multiconductor cables are used in applications where a low profile is required. This is often the case for under carpet installations. Datamaster® Multicore Flat Line product range is used to connect telephones, modems and emergency lighting. It can also be used for analogue intercom systems. Flat profiled cables can also be used for temporary installations where cabling through the roof or wall space would be considered to expensive or difficult to implement. Datamaster® flat cables are PVC insulated and PVC jacketed and come in 4, 6, 8 and 10 core versions.
